

Gravity Driver Trainers

Gravity puts a great deal of emphasis on our drivers as they are literally the "driving" force of our company. Whether it's water or chemicals needing to be moved, light towers, generators, or heaters, they all require a driver to get them to our customers. Our drivers are put through rigorous training to ensure physical and mental ability, keeping up with all D.O.T. certifications, and more. Gravity's drivers are who our customers see and interact with daily. Gravity's drivers are who customers depend on. Our drivers are also known as the face of Gravity. With all the road time, and unforeseen circumstances like unpredictable weather or road conditions, it is vital to have the proper training for this role. Thus, the Driver Trainer. The Gravity Driver Trainer, can have so much impact on the company (all of us) by training the next generation of drivers to do the job right, safely, and represent the Gravity family well.

Our Driver Trainers are responsible for keeping our drivers and communities safe and will keep Gravity trucking into 2022. Our Driver Trainers are:

Adolfo Cruz - Winch Truck Operator
Jose Montes - Vac Truck Operator
James Bolton - Hot Oiler Operator
Victor Borunda - Winch Truck Operator
Ronnie Gonzales - Forklift Operator
Manuel Ortega - Vac Truck Operator
Alejandro Aguirre - Winch Truck Operator

"The reason we do the driver trainer program is to instill safety which is one of our core values here at Gravity. One reason I personally feel Gravity's Driver Trainers are so unique, is because of their level of skill and abundance of patience when teaching a newly hired, eager employee about Gravity's expectations, not just customer satisfaction and their expectations, but for everyone's individual safety. I cannot emphasize enough the importance of this role.

I want to commend the Driver Trainers for their level of professionalism, pride and always going above and beyond their job requirements. I believe whole heartedly that one of the most important jobs in the company is that of a Driver Trainer."

Edward Marquez
Transportation Safety and Training Specialist
