

EMPLOYEE SPOTLIGHT

JOHN MOSLEY

Technical Services Manager

Odessa, Texas

Introducing John Mosley, our May employee spotlight! John is our Technical Services Manager at our production chemicals division, Tech Management.

John grew up in a small town outside of Andrews, Frankel City, Texas. John's father worked for el Paso Natural Gas who provided company-owned housing in the company camp. "They say it takes a village to raise a child, and that is the way it was in the camp" says John. He spent a lot of time riding motorcycles, playing all sorts of games with other camp kids, hunting and swimming.

After high school, John moved to Odessa and received his associates degree at Odessa College, then transferred to Texas Tech University in Lubbock and received his Bachelor degree in Geology with a minor in Geophysics.

While attending college John had several jobs such as mowing yards, moving furniture, roustabout and other oilfield-related jobs. John started at Tech Management in 2018. "My first position with Tech Management was as an Area Manager in sales. I was in that position for about a year when a position opened up as the Laboratory Manager. The Lab was just getting started so I was interested in the challenge of helping grow the lab capabilities. Fortunately, there is a great staff of Laboratory Technicians to make it all work and get things rolling in the lab. When I first started in the Lab we were averaging around 100 samples per month. By the time that I left the Laboratory Manager position we were averaging around 3,000 samples per month with a turnaround time of less than 3 days. About six months ago another opportunity opened up and I took on a new role as the Technical Services Manager. I still work very closely with the Laboratory Team providing data and solutions to our sales staff and customers."

"Mike Hughes and Tommy Graham, out upper management team, have supported the Technical Teams by provided the equipment, instruments, and tools that we need to be successful. Having that support from Management makes the job much easier and exciting. The Lab Technicians and Technical Service Reps at Tech Management are a hardworking, dedicated group of individuals that I have really enjoyed working with" says John.
