- 15 psi vacuum
- Floor operated start/stop
- Detachable pump/motor
- Extended hose length
- 30-minute run time, auto shut-off
- Pump/motor operating light
- Emergency kill switch

Provides quick cleanup of fluids with a small footprint.

Designed for placement next to rigs for quick cleanup on the floors, deck and cellars, it's also versatile enough to be used at refineries, industrial, environmental or manufacturing locations.

The enclosed SuperVac is ideal for locations where extreme cold can be problematic. Optional heated pressure washers are included on some units.

Made to perform with a variety of safeguards to protect both the asset and personnel, the Gravity SuperVac is the most efficient way to quickly clean up fluid spills in remote locations.
